

- 1 use factual api to retrieve results
- 2 this means user selected add and continue so they can add more products

R1 **R (Rod)** 12/01/2015
use factual api to retrieve data. After awhile we may be able to search our own data first before going out to the factual data

R2 **R (Rod)** 12/01/2015
not sure if this step is needed with web sockets

R3 **R (Rod)** 12/01/2015
from this entry point there shouldn't be queued items as they should have already been sent
